

Rahaf Fallatah

Frontend Developer

rahaf77553@gmail.com | (+966)507897807 | Makkah | Saudi Arabia | Open to relocate to Riyadh or Jeddah | [LinkedIn](#) | [GitHub](#)

Summary

Performance-driven Frontend Developer with a Bachelor’s degree in Information Systems and hands-on experience building scalable, user-centric web platforms using React.js, TypeScript, and modern CSS frameworks. Specialized in translating Figma designs into responsive, production-ready components, architecting client-side state management via Context API, and integrating RESTful APIs with clean error-handling logic.

Experience

Frontend developer , Techwin	12/2025 – Present Makkah
- Transformed Figma designs into 9+ fully responsive, interactive web platform screens using React.js, Tailwind CSS, and Ant Design components across multiple device breakpoints. - Built 7+ custom React hooks to handle POST requests, explicit client-side validation, and error handling, reducing runtime bugs across the application. - Architected client-side state management using React Context API and local states to manage complex user flows seamlessly. - Streamlined frontend deployment by automating build and release workflows via Netlify CI/CD, reducing manual release steps.	
Software Engineer , SDA & General Assembly	08/2025 – 11/2025 Remote
- Developed dynamic frontend interfaces for full-stack applications using React.js, connecting components to Django REST API backends. - Designed and executed test suites for 15+ REST API endpoints using Postman, improving frontend-backend integration reliability. - Collaborated in Agile sprint environments to continuously debug frontend views and enhance client-side authentication workflows.	
Full Stack Developer , Tuwaiq Academy	02/2025 – 05/2025 Riyadh
- Built 3+ full-stack web applications during an intensive 300-hour program using HTML5, CSS3, JavaScript, and Bootstrap. - Implemented a complete client-side checkout flow integrated with Moyasar Payment API, parsing redirect responses to update UI states dynamically. - Managed version control and resolved merge conflicts using Git and GitHub during collaborative frontend sprints.	

Education

Bachelor of information systems , Umm Alqura university	2020 – 2024 Saudi Arabia, Makkah
--	-------------------------------------

Skills

- Core Frontend:** JavaScript (ES6+), TypeScript , HTML5, CSS3, Responsive Web Design
- Frameworks & Libraries:** React.js, Next.js , Tailwind CSS, Bootstrap, Ant Design
- State & Architecture:** Context API, React Hooks (useState, useEffect), Component Lifecycle
- API & Integration:** REST API Integration, JSON Parsing, Postman, Payment Gateways (Moyasar)
- Tools & Workflow:** Git, GitHub, Netlify, CI/CD , Agile/Scrum

Projects

- Personal Project - Lavendra**, (Role: Full Stack Developer) | in Progress..
 - Tools: Next.js, TypeScript, Ant Design ,Tailwind CSS, PostgreSQL, Prisma, Neon
 - Description: Building a production-level salon management system using Next.js and TypeScript, targeting real-world deployment as a primary portfolio showcase.
- Techwin Project - Maqas**, (Role: Frontend Developer)
 - Tools:** React.js, Ant Design, Tailwind CSS
 - Description:** Engineered 9+ production-level responsive web screens for a tailoring management platform, ensuring pixel-perfect UI translation from Figma designs and implementing custom client-side validation logic.
- GA Project - Aniverse**, (Role: Frontend Developer & Backend Developer)
 - Tools:** React.js, Django, PostgreSQL, Postman
 - Description:** Built a full stack anime community platform, architecting dynamic state management for user posts, interactions, and comments with full CRUD functionality.
- Tuwaiq Academy Project - Lafesta**, (Role: Full Stack Developer)
 - Tools:** HTML, CSS, JavaScript, Bootstrap, Django, Moyasar API
 - Description:** Developed a dress rental platform integrating a secure checkout payment journey using Moyasar’s redirect handling logic.
